

INSYS locks

## ScaMo Pro Safe

Process-reliable insertion of safebags

Future-oriented process mapping

Stand-alone solution

Seamless logging

# ScaMo Pro Safe

## The challenge

The safe and efficient depositing of cash in day-to-day business is a fundamental requirement in companies with cash volumes. Certified deposit safes from FORMAT minimise the risk of loss due to robbery and theft, and thus secure the cash handling from the cash register personnel to the handover to the cash transport company.

These safes have deposit drawers with an integrated return lock, which prevents subsequent removal of the deposited goods. Appropriate solutions are available depending on the amount of cash and the required sum to be insured. The opening and closing process of classic deposit safes is carried out by means of a double-bit lock or an electronic lock.

## ScaMo Pro Safe –

### Future-oriented in safety, process and efficiency

ScaMo Pro Safe is a joint development of FORMAT, one of the leading European safe manufacturers, and INSYS, a manufacturer of innovative lock systems. As a result of many years of close cooperation, the INSYS solution EloStar® Master Scan was jointly further developed in order to implement cash handling in companies with cash volumes being securely, efficiently, tamper-proof and digitally logged.

ScaMo Pro Safe is a complete system for the safe and efficient deposit of cash stocks and can thus be used autonomously.

By connecting the smart INSYS lock solution, the depositing of cash stocks can not only be mapped efficiently:

every opening and depositing of the ScaMo Pro Safe is logged seamlessly

### Suitable for

- Retail companies & filling stations
- Gastronomy & hotel industry
- Cash-in-transit companies
- and much more.

### ScaMo Pro Retrofit Kit

Thanks to the ScaMo Pro retrofit kit, this process optimisation can also be applied to existing deposit solutions regardless of the manufacturer. Experienced FORMAT service technicians will be happy to implement this solution for you – feel free to contact us about retrofitting.

Available in different sizes and the following resistance grades depending on your cash volume

Insurable up to € 20,000\*

Insurable up to € 50,000\*

Insurable up to € 100,000\*

\* Recommended insurance amounts in Germany / models weighing less than 1,000 kg should be anchored. Please consult with your insurer for amounts and anchoring regulations

### How it works from the point of view of your cashier

- Authentication using a personal number, entering the exact amount of money and scanning the safebag barcode
- Tray opens
- Safebag is placed in the tray and tray is closed
- Safebag is dropped into the vault area
- EloStar® Master Scan reports proper closing of the deposit tray

### The added value from the point of view of your cashiers

- Minimising the risk of loss through secured cash holdings
- User-friendly and efficient deposits
- Seamless logging of all events

### How it works from the point of view of your company

- Efficient and safe deposits
- Logging of all deposit transactions by means of EloStar® Master Scan Module TwinIP
- Readout of the logs via card
- Optional real-time monitoring

### The added value for your company

- Minimising the risk of loss through secured cash holdings
- Future-oriented process mapping
- Secure process flows
- Cost-efficient handover processes to cash-in-transit companies
- Optional online real-time logging
- Optional differing security levels for insertion and removal (4-eyes principle)

### How it works from the point of view of the cash-in-transit company

- Authentication using a 6-digit PIN code
- Removal of the safebags
- Counter-scanning of the safebags with handhelds and comparison with the number of safebags stored in the EloStar® Master Scan
- Manual or automatic closing of the door lock

### The added value for the cash-in-transit company

- User-friendly opening and closing process
- Efficient handover processes
- Complete traceability of the removal / collection via logging
- Optional one-time code operation

# ScaMo Pro Safe

## The advantages of the ScaMo Pro at a glance

- Efficient safeguarding of cash holdings in day-to-day business
- Reduction of the risk of loss resulting from robbery or theft
- Secure process flows
- Seamless logging and documentation of all events
- Stand-alone solution - no additional hardware required
- Can be retrofitted to existing deposit safes regardless of manufacturer
