

Front- / Back office **IQ.Safe | Store Safe**

Storing cash safely and efficiently in day-to-day business

The secure storage of cash stocks or change in day-to-day business is a major challenge in retail businesses, the catering industry and other institutions with cash payments.

On the one hand, companies must fulfil the current requirements of the employers' liability insurance associations to protect their employees from robberies, in Germany, for example, in accordance with the DGUV's UVV robbery prevention regulations. On the other hand, employees themselves often represent a risk of loss. According to various studies, the number of thefts in companies is increasing and, in addition to classic shoplifting, thefts by employees are increasingly being recognised.

IQ.Safe | Store Safe – the all-in-one safe
incl. banknote depositor

The advantages of this solution:

- Reduction of the risk of loss (internal theft / robbery)
- Efficient cash disposal without the dual control principle
- In accordance with current German DGUV regulations for UVV robbery prevention
- Closed cash cycle
- Transfer of cash responsibility
- Optionally with connection to your POS system
- PoS or back office, free-standing or integrated
- Customised to your security requirements profile
- Sum insured to be agreed with your insurer

Ideally suited for

- Cash holdings in daily business
- Change / counterfeit money check
- Cash drawers, mobile POS devices
- Documents etc.
