EloStar® Master

Design your security according to your preferences

The EloStar® Master lock family is versatile and is suitable for both, safes and security containers as well as ATMS and cash management systems. Therefore, it is not limited to one sector or application by far. The fully-automated electronic lock is frequently used in banks and also in wholesale and retail as well as by business users. CIT providers estimate the system due to its high flexibility.

These highlights make the EloStar® Master convincing:

- Versatile opening methods can be used such as one-time code functionality
- 2 lock operation
- Easy programming and configuration
- User management
- Duress alarm with one-time code
- Complete logging
- Switchable operating mode (bank/CIT)

Wide field of application for highly secure opening mechanisms

In connection with MultiPad Go!®, the well-proven one-time code user platform of INSYS locks, the locks will be opened using one-time codes (OTC), standard codes, chip cards or RFID opening media. This allows nearly infinite application scenarios.

1

Configuration and event log in offline operating mode

- Configuration in the head office
- Manual upload: of this configuration to the locks using a chip card
- Event log will be stored on the chip card and can then be evaluated in the head office

2

One-time code in offline operating mode

- Generation of one-time codes in the head office
- Code transmission to external CIT or other providers via SMS, e-mail or phone
- Opening takes place by e.g. one-time code input + personal PIN
- Optional via personnel number and RFID

One-time code
