Intuitive usability

Service-friendly design

Easy integration into the counter,
checkout etc.

With tamper-proof coin box
(overflow-box)

PayMPoint

PayMPoint – the modular payment system of FORMAT – Enables an automated, secured and transparent payment process at the point of sale.

Customers pay for their goods independently at the PayMPoint. Your sales staff don't get in contact with cash, which especially offers hygienic and technical advantages in the food sector.

The PayMPoint is ideally suited for stationary food and retail trade, in gastronomy and ticketing.

PayMPoint

Safe and contactless

With PayMPoint at the service- and sales counters you automate cash transactions, without access to the cash for the operating personal.

Transparency in real time

Furthermore, the relocation of the cash handling in a reliably working automated system improved monitoring and analysis of the cash situation at the checkout area of every business.

Optimized cash-recycling

Hereby feeding and removal of cash can be planned in line with the requirements. Empty runs of security services (CIT)

are avoided. In the cash process involved employees can transparently control and monitor the cash flow during operations without having access to cash.

Integration into your POS system

The PayMPoint can be integrated seamlessly into your current POS system. At your request, we create an appropriate interface to your current cash register software.

Individual design

The design can be adapted individually to your shop fitting concept.
